Re: West Coast Tomato Growers, Inc. Proposed Farm Worker Housing

Dear Sergio,

I am a land use consultant representing West Coast Tomato Growers, Inc. (the "Applicant") in connection with their proposal to construct new farm worker housing to support their agricultural operations.

By way of background, Applicant is an entity controlled by the Singh family who have been farming in Oceanside since the late 1930s. They are currently cultivating 750 acres of crops of which 381 acres is under a long-term lease with Global Ag Properties II USA, LLC ("Owner"). Applicant also owns and operates a 25,000 SF packing facility located at 5780 Mission Avenue.

Applicant employs approximately 110 full time employees and up to 600 seasonal farm workers during the growing and harvesting season which typically runs from May to November each year. For the past 10 years, Applicant has leased dormitory and modular housing for these seasonal farm workers nearby at 30041 North River Road which is owned by UTR, LLC. Recently, Applicant learned that UTR, LLC will not be renewing its lease which expires on January 31, 2022 jeopardizing the Applicant's 2022 farming season.

In order for Applicant to continue its farming operations, an alternate site to house the farm workers is required commencing with the 2022 growing season. Applicant is engaged in discussions with the Owner to purchase approximately 9.98 acres of APN 122-130-32-00 (170.1 acres) for this use which is a part of the 381 acres under lease. Please (See aerial photo of the proposed site attached to the Pre-Application Request Form.) This site is located on the south side of North River Road approximately 2,000 linear feet east of Sleeping Indian Road. In order not to disrupt next year's planting and harvesting, this housing must be available for occupancy by May 1, 2022.

As reflected on the schematic site plan attached to the Pre-Application Request Form, Applicant is proposing 21 triple-wide manufactured homes measuring 71'x 45' (3,195 SF each). Twenty (20) of the modules include living quarters, a kitchen, bathrooms, showers, and laundry facilities and one (1) module will be used for storage/laundry. Elevations and floor plans have been attached to the Pre-

Application Request Form. As none of the seasonal workers at this location will have vehicles, daily transportation to and from the fields will be provided by Applicant's privately-owned buses, which is the current arrangement. Furthermore, this housing is seasonal and will only be occupied approximately nine months of the year.

This property is located in the A District, which permits agricultural uses including farm worker housing in excess of 36 beds with a use permit. Please confirm our understanding that a use permit is needed and what, if any, technical reports will be required. In addition, we will be submitting grading and improvement plans for approval. Given the time sensitive nature of the need for this proposed housing, please provide us with an anticipated processing schedule assuming accelerated review.

We also intend to process a parcel map to create a legal lot for the 9.98 acre parcel that the housing will be located on. Once the final parcel map is approved and recorded, title to the property will be transferred from Owner to the Applicant.

If you have any questions, please contact me at 619.840.3341.

Sincerely,

A handwritten signature in blue ink that reads "Terry R. Plowden". The signature is fluid and cursive, with the first name being the most prominent.

Terry R. Plowden
